PRODUCT CATALOGUE

THE PRODUCT

Hand made from pure plaster, reinforced with strong durable fibreglass strands which can be easily installed to any wall or ceiling surface. Harder plasters are available for application requiring greater durability. These plasters can be up to three times the hardness of normal casting plaster.

PROVEN PLASTERGLASS PROPERTIES

- Fire Resistance* *Plasterglass is made from non-combustible gypsum and fibreglass. It will not burn, spread flame, evolve heat or smoke.*
- Hygiene* *Plasterglass is Grade 'A' approved for hygiene because it contains no organic matter.*
- Inert* *Plasterglass is an inert material, creating no problems with expansion or contraction.*

RESTORATION

Inclusively, we are pleased to offer our expertise in services and advice on restorative tasks of any nature or complexity. We are capable of repairing and replicating any piece or item of decorative plasterwork, no matter how small or extensive.

CUSTOM WORK

The company is equally at ease with the creation of traditional and contemporary custom manufacturing for any period or mode.

PACKAGING

All our products are packaged and delivered locally, nationally and internationally. Our staff have developed a superior freighting program that enables us to forward our product with a guarantee that all items arrive at the nominated destination in pristine condition.

SHOWROOM

We cordially invite you to visit our new showroom which displays one of Australia's best exhibits of ornamental handcrafted plaster work. We assure you that there will be something to suit every personal requirement.
